

The greatest advantage of Linoleum XF is the reduced cleaning and maintenance. Compared with untreated linoleum, several steps are no longer necessary, and the whole cleaning and maintenance process is simplified.

Three Easy Steps:

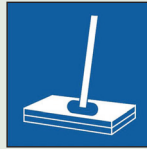

It is easy. Sweep, Wash, and Rinse. There is no need for the hassles and cost of applying waxes or other surface treatments.

General advice:

Resilient floors can be damaged by solvents. Wipe up any grease or stains immediately, as it may damage the surface. Black rubber wheels, feet, or mats can discolor flooring. To avoid damage, chairs and stools should be fit with quality plastic protective end caps. Remember, light colors may need more frequent cleaning.

About 80% of surface soiling that has to be cleaned off is brought from outside. And 90% of that soiling can be avoided by an effective and correctly dimensioned entrance mat.

Dry Mopping / Sweeping Removes dust and dirt. Use yarn or micro-fiber mops, or soft bristled brooms. Avoid impregnated dust mops.

Wet Mopping Removes soil and other contaminants. Use a diluted neutral cleaner and rinse thoroughly to avoid heavy build up of residues.

Auto-Scrubbing Is more effective and efficient for large areas. Use a diluted neutral cleaner and rinse thoroughly to avoid heavy build up of residues. White pads are used for regular maintenance. Red pads are used for periodic deeper cleaning.

Treat stains immediately. Handle spot using a white rag with mineral spirits or neutral detergent (solvents should not be used). Work from the outside of the mark towards its center. Rinse with water and dry. Avoid the use of solvents.

Be sure to consult with your local cleaning supplier for cleaners and equipment. Tarkett Sports does not assume liability for damage caused by improper methods or use of chemicals. Confer also with your EcoPure flooring provider for more information.
